Kevin Macwan

React-Native Developer

I'm an accomplished React Native developer skilled in creating cross-platform mobile applications. My expertise spans JavaScript, TypeScript, and integrating native components, ensuring high-quality, user-friendly solutions. I excel in collaborative, agile settings, delivering top-notch app experiences.

EXPERIENCE (4 years 3 months)

AJACKUS, Mumbai, Maharashtra — *Software Engineer*

DEC 2023 - PRESENT

Codentic Software, Gujarat,India — *React-Native Developer*

DEC 2020 - AUG 2023

PROJECTS

GridMaster

- Participated in Agile ceremonies, including sprint planning, daily Scrum practices, UAT plan and
- retrospective meetings for continuous improvement and to be in release Track.
- Involved in developing Hybrid mobile application with React-Native framework.
- Implemented multi-sport support in the application.
- Developed frontend and backend (Python Django) for the private league module, enabling users to
- create custom contests. Contributed to backend support and improvements.

MPP RegPal

- Developed the frontend from scratch using Next.js, ensuring dynamic rendering based on backend data.
- Improved backend functionality in Django, optimizing data flow and API performance.
- Created UI enhancements for better user experience and responsiveness.
- Worked closely with the backend team to refine data structures and optimize API performance.

Secyore Enterprise

- Focused on UI improvements for better user experience and efficiency.
- Developed DB schema visualization to display MSSQL/MySQL table relationships.
- Optimized UI components for improved performance and usability..

SKILLS

React-Native
React
Python
Django
Javascript
Typescript
HTML
CSS
UI/UX
Redux
Mobx
Git
CI-CD
Github Actions

Familiar

iOS
Android
Nodejs
Next Js

Tools

VS Code

EDUCATION

DrunR

- Built and refined the React Native frontend for an AI-based support chatbot.
- Designed and implemented UI components for interactive health guidance.
- Integrated AI chatbot for user queries and fitness recommendations.

Grocery Store

- Created a user-friendly e-commerce grocery application.
- Seamlessly integrated Razor Pay for secure transactions.
- Implemented live order tracking for enhanced user experience.
- Utilized Firebase for real-time push notifications.

Electricity Bill Management

- Collaborated on code refactoring and critical bug fixes.
- Integrated Paytm for easy electricity bill payments.
- Developed informative usage graphs for data visualization.
- Ensured secure access with Azure B2C Authentication.
- Enabled real-time notifications using Azure Notification Hub.
- Seamlessly integrated IoT smart devices for enhanced functionality.

Motel Management

- Played a role in a comprehensive motel management project.
- Implemented role-based authentication with Apple login and pin–based controls.
- Developed core features like check-in/check-out, room management, and payslip generation.
- Enabled the creation of PDF-based reports for detailed data insights.

Human capital management

- Played a role in a user-focused HCM project.
- Improved global accessibility with RTL and i18n support.
- Implemented Azure B2C Tenant-based authentication.
- Developed fully dynamic API-based forms with attachment capabilities.
- Introduced location-based punch-in/punch-out for accuracy.
- Presented actionable insights through graphical data representation.
